Experience

UX/UI & Product Designer at IWIS

- Worked on improving the mobile application and introducing new solutions based on data-driven hypotheses.
- Architected a structured Design System with a focus on Design Tokens and comprehensive documentation for engineering teams.
- Conducted regular UX audits and analyzed Hotjar heatmaps to identify and resolve usability issues, enhancing the overall user experience.
- Partnered with Product Managers to align design strategy with business goals and technical feasibility.

July 2025 - Present

UX/UI designer at Freelance

- Designed an MVP to validate user interest and support investor pitches/funding rounds.
- Led the redesign of 5 websites, collaborating with stakeholders and devs to boost business metrics.
- Developed an intuitive dashboard system for Power BI to simplify complex data reporting.
- Conducted audits and client presentations to ensure design quality and strategic alignment.

November 2024 - Present

Product designer at Qoders Family [UPQODE]

- Created CRM systems and created surveys to collect quantitative data for researches.
- Successfully implemented Framer as a no-code tool to make development faster and create MVPs/prototypes.
- Designed and launched apps on Shopify, Webflow, and WIX, improving product functionality and reach.
- Designed two web applications and later improved their functionality.
- Worked with JTBD, personas, user flows, and the Value Proposition Canvas.

November 2022 - September 2024

UX/UI designer at Qoders Family [UPQODE]

- Designed and launched a SaaS WordPress theme, reaching 200+ paid customers within the first release phase.
- Launched 50+ commercial projects that emphasized engaging user experiences and strong branding.
- Built and published 10+ custom themes for WordPress and Framer, expanding digital solutions and enhancing client satisfaction.
- Redesigned a consulting firm's website, resulting in a significant user base increase and securing a long-term strategic partnership.
- Developed a library of ready-made elements in collaboration with the team, ensuring cohesive design and UX consistency across products.

October 2021 - September 2024

UX/UI designer at Freelance

- Redesigned a mobile application and presented it to customers, focusing on improved user experience and visual appeal.
- Built landing pages and website concepts to effectively attract and convert visitors.
- Developed sets of covers for social media, supporting engagement and brand cohesion.

March 2021 - September 2021
